# Gourav

New Delhi, India | +91- 9891913958 | gouravbhardwaj2004@gmail.com | LinkedIn | GitHub

## Education

**SRM University, Delhi NCR, Sonipat, Haryana** — Final Year | Expected Jul 2027
*Bachelor of Technology in Computer Science & Engineering | CGPA: 7.19/10*

**Guru Dronacharya Sr. Sec. School** — Jind Haryana
*Class XII (HBSE) | 70.2%* — *Apr 2022 – March 2023*

## Technical Skills

**Languages**: Python, SQL, C, HTML/CSS, LaTeX
**Frameworks & Libraries**: Streamlit, Pandas, NumPy, Matplotlib
**Data Science & Analytics**: Statistics, Power BI, Tableau, Microsoft Excel, Probability
**Tools & Platforms**: Git, GitHub, AWS, Google Collab, VS Code, Jupyter Notebook

## Experience

**Data Scientists Intern** — Jan 2026 – Feb 2026
*Incodevision, Uttarkhand, India | Certificate*

- Collected, cleaned, and analyzed structured datasets using Python (Pandas, NumPy), performed data preprocessing and exploratory analysis, and extracted actionable insights from data.
- Developed, trained, and evaluated machine learning models for prediction and classification tasks, using appropriate performance metrics to assess model accuracy and effectiveness.

## Projects

**Real-Estate-Price-Prediction** — 2026
*Python, HTML/CSS, Streamlit | Project Repo*

- Developed and evaluated a machine learning regression model to predict residential property prices using a structured housing dataset, improving prediction accuracy through effective feature selection and model optimization.
- Performed comprehensive data preprocessing, including handling missing values, detecting and removing outliers, engineering relevant features, and encoding categorical variables to prepare the dataset for machine learning.

**A-real-time-weather-monotring-app** — 2025
*Python, Pandas, HTML/CSS | Project Repo*

- Developed a real-time weather monitoring application that integrates weather APIs to fetch and display live weather information, including temperature, humidity, wind speed, and forecast details through an interactive and user-friendly interface.
- Collected, processed, and dynamically updated real-time weather data using API requests, handling key weather parameters and presenting the information in a clear format to enable users to quickly understand current and forecasted weather conditions.

## Training Activities

- Participated in multiple technical workshops conducted by leading corporate organizations, gaining practical exposure to Data Analytics, Machine Learning, Generative AI, and Agentic AI, with a focus on industry-oriented tools, applications, and emerging technologies.
- Led and managed multiple technical workshops for junior students at the university, delivering hands-on sessions on SQL, Statistics, and Power BI Dashboard Development.
- Provided practical demonstrations and guided participants through real-world data analysis, query writing, data visualization, and interactive dashboard implementation.

## Certifications

- **Courses**: Career Essentials in Data Analysis by Microsoft and LinkedIn, Career Essentials in Generative AI by Microsoft and LinkedIn, Learning Power BI Desktop – LinkedIn Learning.
- **Google Cloud**: GenAI Study Jam 2023.
